

### **East Valley/West Rathdrum Prairie Transportation Study**

'Themes' from Public Comments Gathered at 4/11/07 public open house and through emails

- There is a need for public transportation between Spokane and Post Falls/Coeur d'Alene.
- Traffic congestion in the Barker area will get bad after developments are built.
- On-off ramps from Liberty Lake through Post Falls are already congested and will fail with future development.
- SH 41 is overloaded already and will only get worse with continued development.
- The truck scales at State Line are poorly located and congestion will get worse when the Cabelas complex opens.
- The planned 5 lanes on Interstate 90 from Sullivan to the Stateline does not make sense, as the lanes are reduced down to two past Stateline.
