

KOOTENAI COUNTY

TRANSIT SYSTEM

Community Members:

Over the past three years, the Kootenai County Public Transportation (Transit) Office has conducted extensive outreach including hosting local and regional public transportation (transit) planning meetings as well as meeting with city planners, elected officials, city council members, state and local agencies, law enforcement, social services, employers, employees, health care providers, transportation providers, non-profit entities, disability advocates and riders.

The reality is, no public transportation agency can operate a system that maximizes both coverage and ridership within a set budget. There are limitations, leading to necessary trade-offs, depending on the priority of the community transportation need.

The following pages will show where the existing regional public transportation system is in Kootenai County now, as well as setting goals for providing efficient and equitable service improvements through the identification of goals, objectives, strategies, and actions.

This document is meant to be a living document and should be updated yearly, or when goals are achieved or new gaps are identified.

INTRODUCTION

Transportation is vital to keeping people connected to neighborhoods, employment, shopping, education, health care, recreation, community services, family, friends, and many other services and activities. For a segment of the population, particularly individuals with disabilities, older adults, and people with low incomes, maintaining a basic level of mobility can be a challenge.

Considerable resources are committed to our transportation infrastructure and systems; however, transportation services for disadvantaged populations are often fragmented, underused, duplicative, costly, and difficult to navigate. In many cases, especially in rural or less densely populated areas, there are service gaps, and transportation services are simply not available to meet existing needs.

When transportation services are coordinated, providers can be more efficient, services are improved, and mobility for all residents is enhanced.

PURPOSE

This document serves two purposes:

First, it serves as a framework to improve coordination among transportation service providers and human service agencies to enhance transportation services for the community, but in particular, the transportation challenged populations.

Second, this document meets federal requirements for a “locally developed, coordinated human services transportation plan” – or Coordination Plan - that includes the following elements:

- An assessment of available services that identify current transportation providers (public, private, and non-profit);
- An assessment of transportation needs for individuals with disabilities, older adults, and people with low incomes. This assessment includes experiences and perceptions of the planning partners as well as more sophisticated data-collection efforts (Intelligent Transportation System (ITS), and current gaps in service;
- Strategies, activities, and/or projects to address gaps between current services and needs, as well as opportunities to achieve efficiencies in service delivery;
- Priorities for implementation based on resources, time, and feasibility for implementing specific strategies and/or activities identified.

Core requirements of these Coordinated Public Transit/Human Service Transportation Plans include:

- An assessment of transportation needs for veterans (*see Appendix 7), individuals with disabilities, older adults, and persons with limited incomes;

- An inventory of available transportation services identifying areas of redundant service and gaps in service; strategies to address the identified gaps in service;
- Identification of coordination actions to eliminate or reduce duplication in services, and strategies for more efficient utilization of resources;
- Prioritization of implementation strategies.

BACKGROUND – FEDERAL AND STATE REQUIREMENTS

Coordinating Council on Access and Mobility

President Bush signed an Executive Order on February 24, 2004, “to enhance access to transportation to improve mobility, employment opportunities, and access to community services for persons who are transportation-disadvantaged.” The Executive Order also established the Interagency Transportation Coordinating Council on Access and Mobility (CCAM) initiative aimed at improving the availability, quality, and efficient delivery of transportation services for older adults, people with disabilities, and individuals with lower incomes, by advancing the following goals:

- Promote interagency cooperation and the establishment of appropriate mechanisms to minimize duplication and overlap of Federal programs and services so that transportation-disadvantaged persons have access to more transportation services,
- Facilitate access to the most appropriate, cost-effective transportation services within existing resources,
- Encourage enhanced customer access to a variety of transportation resources available,
- Formulate and implement administrative, policy, and procedural mechanisms that enhance transportation services at all levels, and
- Develop and implement a method for monitoring progress on achieving the goals of the Order.

In December 2014, the GAO reviewed nonemergency medical transportation (NEMT) services and issued [Report GAO-15-110](#) with the following recommendations for CCAM:

- Publish a strategic plan for nonemergency medical transportation services coordination
- Issue a cost-sharing policy
- Address the challenges associated with coordinating federal nonemergency medical transportation programs

In December 2015, the President signed the [Fixing America's Surface Transportation \(FAST\) Act](#) that codified CCAM. FAST Act Section 3006(c) directs the CCAM to develop a strategic plan that:

- Outlines the roles and responsibilities of each CCAM federal agency
- Addresses outstanding recommendations previously made by the Council
- Addresses GAO recommendations concerning local coordination of transportation services
- Proposes changes to federal laws and regulations that will eliminate barriers to local transportation coordination

Since the passage of the FAST Act, CCAM has convened on multiple occasions and hosted listening sessions, with a goal of posting a strategic plan in 2017.

CCAM work groups kicked off in March 2017 to identify and prioritize strategies to meet the [requirements of the FAST Act](#). CCAM is working to address inconsistent, duplicative, and often restrictive federal program rules and regulations that cause transportation services to be fragmented, underutilized, or difficult to navigate. CCAM also is working to simplify customer access to transportation, reduce duplication of transportation services, streamline federal rules that may impede the coordinated delivery of services, and improve the efficiency of services using existing resources.

The FAST Act

The FAST Act (Fixing America's Surface Transportation), which became law on December 4, 2015, reauthorizes the Section 5310 program. The act maintains the requirement that all funded projects are "included in" and "derived from" a coordinated human services transportation plan.

Section 3006(b) of the FAST Act created a discretionary pilot program for innovative coordinated access and mobility -- open to 5310 recipients -- to assist in financing innovative projects for the transportation disadvantaged that improve the coordination of transportation services and non-emergency medical transportation (NEMT) services; such as: the deployment of coordination technology, projects that create or increase access to community, One-Call/One-Click Centers, etc.

In addition, other "nontraditional" projects can be included. Under MAP-21, the program was modified to include projects eligible under the former 5317 New Freedom program, described as: Capital and operating expenses for new public transportation services and alternatives beyond those required by the ADA, designed to assist individuals with disabilities and seniors. Examples include:

- Travel training; volunteer driver programs; building an accessible path to a bus stop including curb-cuts, sidewalks, accessible pedestrian signals or other accessible features; improving signage, or way-finding technology; incremental cost of

providing same day service or door-to-door service; purchasing vehicles to support new accessible taxi, rides sharing and/or vanpooling programs; and mobility management.

ITD Coordinated Mobility Program

In Idaho, rural areas and within small urban areas under 200,000 population are managed and supervised by the Idaho Transportation Department's Public Transportation Division unless otherwise authorized by the Governor of Idaho. In response to the federal FAST Act requirements, the Idaho Transportation Department began its coordinated mobility program to administer the grant programs and provide assistance and oversight for local coordination efforts.

Section 5310: Enhanced Mobility of Seniors, Individuals with Disabilities, and Economically Challenged Persons

The Federal Transit Administration's Section 5310 program grant is intended to enhance mobility for elderly individuals and persons with disabilities, as well as individuals with limited financial means, by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

Traditional Section 5310 project examples include:

- buses and vans
- wheelchair lifts, ramps, and securement devices
- transit-related information technology systems, including scheduling/routing/one-call systems
- mobility management programs
- acquisition of transportation services under a contract, lease, or other arrangement

Nontraditional Section 5310 project examples include:

- travel training
- volunteer driver programs
- building an accessible path to a bus stop, including curb-cuts, sidewalks, accessible pedestrian signals or other accessible features
- improving signage, or way-finding technology
- incremental cost of providing same day service or door-to-door service
- purchasing vehicles to support new accessible taxi, rides sharing and/or vanpooling programs
- mobility management programs

Note: Under MAP-21, the program was modified to include projects eligible under the former Section 5317 New Freedom program, described as capital and operating expenses for new public

transportation services and alternatives beyond those required by the ADA, designed to assist individuals with disabilities and seniors. Examples include:

Travel training; volunteer driver programs; building an accessible path to a bus stop including curb-cuts, sidewalks, accessible pedestrian signals or other accessible features; improving signage, or way-finding technology; incremental cost of providing same day service or door-to-door service; purchasing vehicles to support new accessible taxi, rides sharing and/or vanpooling programs; and mobility management.

LOCAL ROLES AND RESPONSIBILITIES

Public Transportation

Citylink, serving Kootenai and Benewah, is not a monolithic entity; it exists in two separate transit systems that work together to serve a large region encompassing both rural and urban areas. One transit system exists in Kootenai County (Citylink North) and another serves southern Kootenai County and portions of Benewah County (Citylink South). The separation of these two systems is primarily defined by geographic designations, administrative requirements and funding received by each entity from Federal Transit Administration (FTA) and Idaho Transportation Department (ITD).

Kootenai County Transit/Citylink North (Small Urban System)

Citylink North in Kootenai County currently serves Coeur d'Alene, Dalton Gardens, Fernan, Hayden, Huetter, and Post Falls. It is funded by Federal and State funds that are awarded directly to Kootenai County. Local match is provided by participating cities, Kootenai County, Kootenai Health, and the Coeur d'Alene Tribe.

City investment into Citylink North provides a direct benefit to the people of Coeur d'Alene, Dalton Gardens, Fernan, Hayden, Huetter, and Post Falls and the investment is directly proportionate to the kind of system the cities desire.

Coeur d'Alene Tribe/Citylink South (Rural System)

The Tribe receives funding directly from FTA and ITD for Citylink South, in Benewah County, to provide rural service between Worley (Casino) Plummer, DeSmet, and the Riverstone Transit Center.

The Metropolitan Planning Organization

KMPO as the designated regional transportation planning organization pursuant to U.S.C. Title 23 Section 134 and U.S.C. Title 49 Section 5303, is responsible for cooperatively developing and adopting the Metropolitan Transportation Plan (MTP) for all of Kootenai County. The MTP includes a 20 year plan for highways, public transportation, non-motorized, and freight transportation elements. The Coordinated Public Transit Human Services Transportation Plan will work in conjunction with the MTP approved by KMPO.

The call for projects utilizing FTA Section 5310 funds, that are within or provide access to smaller urbanized areas, is conducted by the Metropolitan Planning Organization (MPO) designated for the

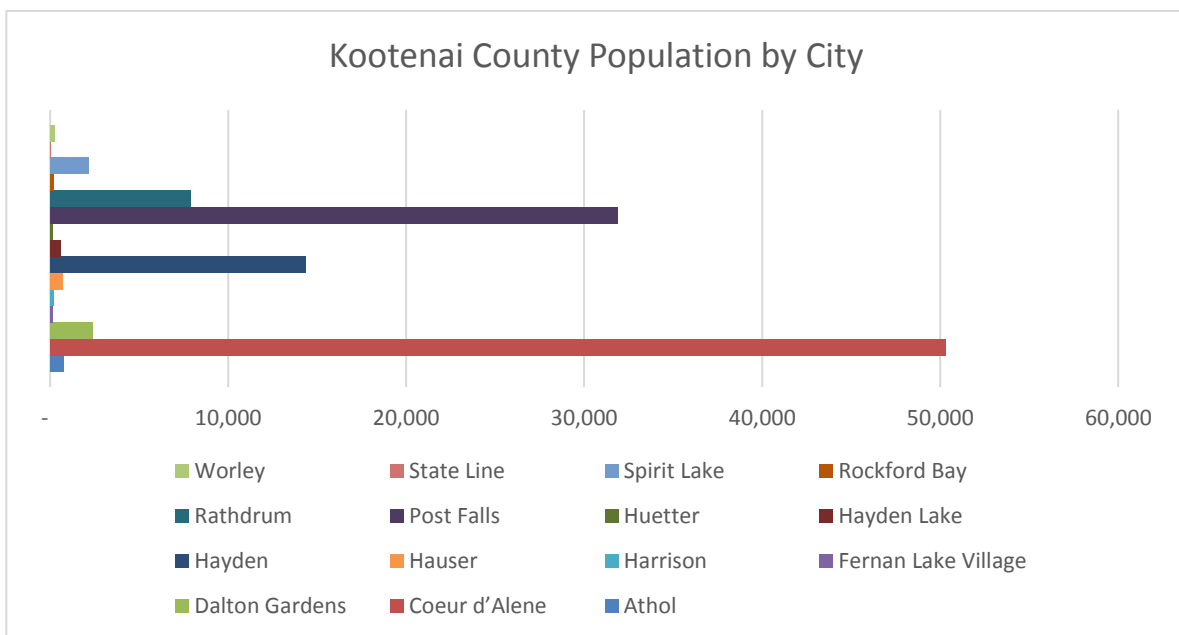

respective urban area and then transmitted to the ITD after approval by the MPO Board.

REGIONAL CONTEXT

Population, employment and Title VI populations impact transit service. Kootenai County is a smaller metropolitan area, surrounded by rural areas, with approximately 142,000 people and 63,000 jobs.

Population

The population of Kootenai County is estimated at 142,783. The highest population densities can be found in Coeur d'Alene and Post Falls. Population is also more concentrated along US 95 between Coeur d'Alene and Hayden. The graph below shows the population breakdown of Kootenai County.

Employment

Employment in Kootenai County is estimated at 68,314. Figure 3, on the next page, shows current employment for the UZA service area. Many of the County's larger employers are located in the Coeur d'Alene and Post Falls areas, with significant employers located outside the urbanized area, including the Coeur d'Alene Casino, and other employers in the Spokane area.

Major Employers According to Idaho Department of Labor

- Kootenai Health (hospital)
- Coeur d'Alene Resort
- Coeur d'Alene Casino
- Center Partners (call centers)
- Silverwood Theme Park

- North Idaho College
- Esterline Advanced Input Systems (manufacturer)
- U.S. Bank (including customer service center)

Households Within The Poverty Level Located Within Citylink North And South Service Areas

Two areas within the small-urban service area experience a higher percentage of households in poverty than the other areas: Southwest Coeur d'Alene and mid Post Falls, south of I-90. Over 7.5 percent of all households are estimated to be in poverty. A number of other portions within Post Falls, Coeur d'Alene and Hayden are estimated to experience between 5 and 7.5 percent of households in poverty.

Outside of the Citylink North transit area, Athol and Rathdrum have estimated median incomes of \$37,880 and \$43,379 respectively. According to citytowninfo, Rathdrum has 17.6% of households below the poverty level and Athol has 15.3% which is higher than the census/gov's 14.5% poverty level in Kootenai County.

Southern Kootenai County, primarily the Plummer and Worley areas, fall below average poverty level in Kootenai County. Worley Idaho has a median income of \$33,418 which is 20% lower than the \$41,336 average income in Coeur d'Alene, while Plummer's median income at \$41,648 is nearly the same. Data on percentage of households at, or below, the poverty level is unavailable.

United Way - ALICE Data

In addition to the poverty data from American Community Survey, there is also a considerable population living above the poverty level but not able to afford the costs of daily life, known as asset limited, income constrained and employed (ALICE). The United Way completes reports on these populations and defines the ALICE population as being employed and technically above the Federal poverty level but still not able to afford what they consider the five basic household necessities of housing, child care, food, transportation and health care. In addition to the 15 percent of households living in poverty across Idaho, there are an additional 22 percent of all households in Idaho are classified as an ALICE household. Given that this population struggles to meet the costs of daily life, providing adequate and affordable transportation services is key to their life. (See Appendix 2 for more information)

Transportation is the cornerstone of a surviving household in an area like Kootenai County, which is a geographically isolated area that is dependent on automobiles for connectivity.

Household Survival Budget		
Monthly Costs	Single Adult	2 Adults, 1 Infant, 1 Preschooler
Housing	\$499.00	\$753.00
Child Care	-	\$829.00
Food	\$197.00	\$595.00
Transportation	\$346.00	\$693.00
Health Care	\$127.00	\$51.00
Miscellaneous	\$138.00	\$366.00
Taxes	\$214.00	\$284.00
Hourly Wage	\$9.13	\$24.18
Monthly Total	\$1,521.00	\$4,030.00
Annual Total	\$18,252.00	\$48,360.00

Sources: 2014 Point-in-Time Data: American Community Survey. ALICE Demographics: American Community Survey; the ALICE Threshold. Budget: U.S. Department of Housing and Urban Development (HUD); U.S. Department of Agriculture (USDA); Bureau of Labor Statistics (BLS); Internal Revenue Service (IRS); Idaho State Tax Commission; Idaho Department of Health and Welfare.

Percentage of Seniors

Similar to the concentration of households in poverty, southwest Coeur d’Alene also experiences a higher percentage of seniors. A large portion in the northern part of the study area, in Hayden, as well as areas within Post Falls and Coeur d’Alene, also experience at least 14 percent of the population over 65. For most of Post Falls, the total number of people over 65 is less than 15 percent. Overall, the population over 65 is concentrated on the eastern portion of the study area. Kootenai County has a slightly higher concentration of people over 65 (17 percent) than the US as a whole (14.5 percent). * See Appendices 5 and 6 for low-income housing information.

According to the Idaho Department of Labor, the over-65 populations is currently 14.7 percent of Idaho’s population, is predicted to account for 34.4 percent of the total growth through 2025, and increase to 17.3 percent of the population. Between 2011 and 2015, the over 65 population in Kootenai County has steadily grown at an exponentially higher rate than any other age group (see Appendix 3). In 2015, the growth of the 65 years of age and older group was 4.3% higher than the average of all other age groups combined.

Many senior-living apartments and condos are being built outside of the transit area, which presents a great difficulty for the senior who is not able, or does not choose, to drive a car.

Population with a Disability

According to Census.gov, 9.4% of people under the age of 65 in Kootenai County have a disability and 12% in Benewah County. The highest percentage of persons with a disability in Kootenai County occurs in downtown Coeur d’Alene (over 17 percent). Portions of Hayden and Dalton Gardens have the second highest levels of persons with a disability. In Post Falls the number of persons with a disability ranges from 10 to 13 percent. Data for other areas was unavailable.

Overall, the southwest corner of Coeur d’Alene has the highest overlapping concentrations of households in poverty, senior-aged persons and people with a disability. The area adjacent to I-90 on the western side of Post Falls also experiences higher concentrations of these populations.

COORDINATION AND PLANNING OVERVIEW

Transit Planning in Kootenai County

Regional transportation planning requires an understanding of the past, recognition of current conditions and the ability to provide an economically achievable, environmentally balanced and consumer-friendly transportation system that enables the region to reach its full potential.

Kootenai County Board of Commissioners supports a coordinated planning effort between the public, cities, small towns, highway districts, the state, transit providers, the Coeur d'Alene Tribe and the Kootenai Metropolitan Planning Organization

Performance-based Planning and Programming

Performance management is a strategic approach that uses performance data to inform decision-making and outcomes. When implemented effectively, performance management can improve project and program delivery, improve investment decisions and provide greater transparency and accountability.

Planning and Programing Purpose:

This program is intended to enhance the mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

What is Coordination?

Coordination is working with, and including the involvement of a wide variety of individuals, agencies, stakeholders and jurisdictions, to collectively advance plans, programs and projects that will efficiently and effectively use limited transportation resources the efficient and effective use of transportation resources for transporting people to important destinations, such as jobs and medical appointments. Coordination means working with transit providers, human service agencies, private institutions, businesses, volunteers and political leaders to broaden transportation options for all users; particularly those in vulnerable populations, the economically disadvantaged, older adults and people with special needs.

Benefits of Coordination

- Improves mobility for everyone
- Makes public transportation more efficient
- Closes gaps in service
- Eliminates duplication of efforts and service
- Allows human service agencies to focus efforts and resources on their core mission
- Provides better service with the same or less resources

Other Strategies to Enhance Mobility

To be most effective, planning for enhanced mobility of seniors and individuals with disabilities must be an integral part of the region's overall transportation planning efforts. Public Transportation planning in Kootenai County, specifically in the UZA, includes several strategies to enhance mobility:

Land use: Support compact development patterns, mixed-use neighborhoods and higher densities to help reduce reliance on private automobiles and increase walking, bicycling and transit usage. In addition, 5310 funding can be used, in partnership with regional planners, to make additions or changes to physical infrastructure (e.g., transportation facilities, sidewalks, etc.), build an accessible path to a bus stop, create curb cuts, sidewalks, accessible pedestrian signal or other accessible features.

Identification of multi-modal options: Identify and support multimodal options that meet the respective needs of seniors, people with disabilities and people who are economically disenfranchised in a manner that enhances their everyday lives.

Fixed-route public transit: Enhance and/or expand Citylink North's fixed-route transit as directed or supported by the local communities.

Enhanced mobility of seniors and individuals with disabilities transportation: Close gaps in service and provide transportation that is convenient and useable for all citizens, particularly disadvantaged populations.

The first three strategies are being considered in various on-going planning efforts:

1. Partner with local jurisdictions for input into **land use** patterns and planning to support mobility as part of the update to the Regional Public Transportation (Transit) Plan;
2. Planning for various modes of transportation as part of the Regional Pubic Transportation (Transit) Plan update;
3. **Fixed-route transit** planning and supportive services are covered in Kootenai County's recently-updated Service and Fare Equity Analysis. Some supportive services considered include:

- North Idaho College shuttle
- Regional vanpooling
- Employment corridor shuttles in conjunction with area businesses
- New Post Falls Fixed Routes
- Rural funding to assist Rathdrum and Athol

This Coordination Plan addresses the fourth strategy:

4. **Transportation serving older adults and people with disabilities**, in addition to people with low incomes, and in particular, coordination of transportation services among service groups.

LOCAL PLANNING PROCESS

Coordination Plan Preparation, Review and Adoption

Kootenai County Public Transportation Office is the lead agency in developing, and subsequently updating the Human Services Transportation Plan.

Preparation of this update to the Human Services Coordination Plan has included:

- The Service and Fare Equity Analysis completed in June of 2017 includes an analysis of current and future needs of special populations.

- Kootenai County's Social Services Advisory Board provided guidance and insight into the unmet needs of the area

- Meeting with disability advocates and people with disabilities

For future years, updates and revisions to the Human Services Coordination plan should be submitted every year at the annual Human Services Coordination planning meeting. A full revision of the plan will be due every three years, rather than every year, so the next full update of the region's Coordination Plan will be due in the fall of 2020.

In interim years, a brief update or minor amendment is expected to address the following:

- Document decisions that have been made regarding coordination

- List milestones and achievements

- Note any changes to coordination approach, strategies, or priorities

- Maintain and update current information on transportation providers in the region

- Document coordination meetings, including agendas, minutes, attendees and outcomes

The changes are intended to strengthen the Coordination Plan's purpose of documenting the coordination planning process, identifying goals and priorities, and guiding resource allocations. In this way, the Coordination Plan will become the primary working document for Kootenai County's Public Transportation (Transit) Department and any local organizations or entities choosing to use 5310 funding.

Coordination Meetings and Planning

Kootenai County Transit

Kootenai County's Public Transportation (Transit) Department, as the lead agency in implementing the Coordination Plan, has undertaken outreach to the community, to social

service agencies, to disability advocates.

Kootenai County Public Transportation (Transit) Department gathered information on regional transportation providers and human service agencies; conducted stakeholder interviews and surveys; held public workshops; validated previously identified gaps in transportation service; and updated goals, objectives, and strategies to address those gaps.

Stakeholder and social service meetings were held to determine priorities for service gaps in 2015 and 2016 and to determine service gaps and set goals for 2017 service. In 2015 and 2016 after implementation of short-term goals, to meet preliminarily identified service gaps, a stakeholder workshop was held on August 28, 2017 to identify new service goals to address gaps in service and ways to meet the needs in Kootenai County alongside and in conjunction with public transportation and non-profit and social service agencies. These exchanges set the foundation for the Human Services Plan.

Social Services Advisory Board and Disability Advocates

The Social Services Advisory Board meets quarterly to facilitate ongoing coordination with human service agencies and to identify and address transit issues related to aging or special-needs individuals. The committee is comprised of members of local community service agencies.

Disability Action Northwest provides input regarding local transportation, as well as gathering input about gaps in service as identified by people with disabilities.

Public Transportation Routes

Citylink North and Citylink South provide two types of fixed route bus service: local and regional. While the local routes provide service in Coeur d'Alene, Dalton Gardens, Hayden, Huetter and Post Falls; the regional routes operate in a simpler north-south line on US 95 in order to provide transportation for Benewah, Plummer, Worley and DeSmet.

Citylink North

The local service providing connections in the Coeur d'Alene, Dalton Gardens and Hayden areas consists of:

- A Route – Downtown Coeur d'Alene
- C Route – Coeur d'Alene, Dalton Gardens and Hayden

The local service providing east and west connections from Coeur d'Alene to Post Falls area:

- B Route – Service between Coeur d'Alene, Huetter and Post Falls

The service operated by the Coeur d'Alene Tribe includes the regional service from the Coeur d'Alene Casino Transfer Station, with options to travel north and south, and include:

- Rural Route (south to DeSmet)

Link Route (north to Coeur d'Alene-Riverstone Park and Ride)
Plummer Express Route (south to Plummer or north to Coeur d'Alene-Lake City Park n'
Ride)

While the Rural and Link Routes serve stops between the origin and destination communities, the Express Route provides direct service between Coeur d'Alene and Plummer. All regional routes provide service for the morning and evening peak periods. The Express Route only provides directional service, traveling south in the morning and north in the evening. Both the Link and Rural Routes provide service in both directions throughout the day (in addition to the peak periods).

A Route

The A Route serves a large number of different destinations throughout the Coeur d'Alene area. The majority of destinations are located in the southern part of the route, south of I-90. The route serves destinations along Lakeside between 1st and 8th and then on Sherman until 23rd. Mostly retail locations are found on Lakeside and Sherman, with residences surrounding them. A number of taller buildings (condos, apartments and resort) can also be found in this area. This area likely represents the most diverse area any of the routes served, with a number of destinations, including:

- Coeur d'Alene City Library
- City Hall
- Coeur d'Alene School District
- North Idaho College
- Lewis and Clark College
- Sorensen Elementary
- Coeur d'Alene Resort
- Chamber of Commerce
- Kootenai County Admin Building
- Parkside Condos

Between downtown Coeur d'Alene and I-90, the A Route serves more community-based resources as well as a number of retail destinations. Throughout this area are a number of restaurants, religious establishments and residential areas.

A number of specific destinations accessible via this route include:

- Kootenai Health
- Heritage Health Center
- Midtown Shopping Center (Safeway)
- Lake City Junior Academy

B Route

In addition to the Riverstone Transfer Center, most of the boarding activity occurs at the east and west boundaries of Post Falls (along Spokane Street and Highway 41). The following stops experience the highest boardings per month:

Cecil/Jenalen
Spokane/Mullan
Spokane/15th
Seltice/Bay

This route serves many health and senior-related destinations. The quarter mile radius for the Blue Route includes the area north of the interstate. In addition to being unable to walk across an interstate, most destinations fall on the south side of the interstate. For the stops between Coeur d'Alene and the majority of Post Falls, the stops serve suburban office parks with some other land uses, including residential. The Seltice/Commerce Loop stop serves the Seltice Business Center; home to a number of businesses. At the Herborn/3rd Ave stop, there are a number of apartment complexes, including low income and senior housing.

Stops west of this stop (roughly located at I-90 and Highway 41) have a greater mix of office, residential and retail destinations. Major destinations served between Highway 41 and downtown Post Falls include:

Wal-Mart Supercenter
Garden Plaza Assisted Living
Life Care Center
Northern Idaho Advanced Care Hospital
Post Falls Senior Center
Post Falls Food Bank
Northwest Specialty Hospital/Urgent Care/Doctors
Kootenai Medical
Post Falls Family Medicine

As the B Route serves downtown Post Falls, the number of destinations is particularly concentrated at three southern stops: 9th Avenue, Seltice/Henry and Idaho/Mullan. A number of restaurants, banks and residential areas are the main destinations in the area and include:

Post Falls Food Bank
Hearthstone Village
Post Falls Square Shopping Center
Bank of American Financial Center
Post Falls Library
Peak Health & Wellness Center
Post Falls School District

The remaining locations in the northern part of Post Falls serve primarily residential areas.

C Route

Similar to the B Route, the C Route also experiences the most boardings at the Riverstone Transfer Center.. The highest boarding stops along the northern part of the route (Hayden) situated along Government Way include:

Government Way/Neider
Government Way/Prairie
Panhandle Health
Hayden Walmart
Hayden Library

This route serves many senior-related, restaurant, and shopping destinations. In addition, there are a higher number of larger retail locations with a variety of different residential types (mobile home parks, estates, apartment buildings, senior living and single-family homes). The quarter mile radius for the C Route, includes North to South destinations that include high density and low-income housing and major service destinations such as:

Special Needs Recreation
Safeway
Costco
Target
Silver Lake Mall
Prairie Shopping Center
Lake City High School
Ramsey Elementary
Affinity Senior Living
Hayden Library
Hayden Walmart
Leisure Park Senior Community
KROC Center
Anton Apartments
Trail Lodge Apartments (Low Income)
Falls Creek (Low Income Apartments)
Kootenai Health

Regional Routes – Citylink South

The regional routes provide access between Coeur d’Alene and the Coeur d’Alene Casino (Link Route), Coeur d’Alene Casino to DeSmet (Rural Route) and direct service from Coeur d’Alene to Plummer (Express Route). The major destinations served for riders using these routes are located in Worley, Plummer and DeSmet, with the exception of the Coeur d’Alene Casino. A number of destinations are within a quarter mile buffer of the bus stops, including:

Worley Community Center
Lakeside Elementary (Worley)
Benewah Medical Center (Plummer)
Wellness Center (Plummer)
Plummer Library
Lakeside High School (Plummer)
Coeur d’Alene Tribal Elementary School (DeSmet)

TRANSPORTATION INVENTORY

Types of Transit Service **See Appendix 8 for a listing*

Older adults and people with disabilities, who do not use their own vehicles, typically use demand-response NEMT, taxis, Ring-a-Ride service, paratransit and escorted transportation.

Fixed-Route Service. A service provided on a repetitive basis along a specific route according to a pre-arranged, published schedule with vehicles stopping to pick up and deliver passengers to specific locations. Each trip is run on a fixed route, servicing the same origins and destinations. Service operates Monday through Friday from 6am-7pm and Saturday from 9am to 4pm excluding major holidays.

Paratransit. Kootenai County Citylink ADA Paratransit service is an origin to destination accessible bus service, within $\frac{3}{4}$ of a mile radius around the fixed route system for those persons with disabilities who are functionally unable to use the wheelchair-accessible fixed-route bus system. Certification for eligibility to ride Kootenai County's Citylink ADA Paratransit is by application and interview and granted for a period of one to three years.

People can qualify for one of three levels of service for Citylink ADA Paratransit service based on the individual's threshold of cognitive and/or physical capacities. The levels are unconditional (full) service, conditional service, and temporary service. ADA Paratransit operates Monday through Friday from 6am-7pm and Saturday from 9am to 4pm excluding major holidays.

Ring-a-Ride Service. Kootenai County provides two types of Ring-a-Ride Services with a six round-trip or a 12 one-way trip limit per month. Ring-a-Ride service may originate outside of the paratransit area but trip destinations must end within it.

Ring-a-Ride offers two types of services: 1) pre-set weekly shopping trips from set origins to destinations within the transit area; and 2) origin to destination service by reservation and subject to availability. Ring-a-ride operates Monday through Friday from 6am-7pm and Saturday from 9am to 4pm excluding major holidays.

Within the transit area:

Ring-a-Ride Service is available, by application, within the transit area, for clients who are over the age of 65. Ring-a-Ride Service is also available to Kootenai County residents to help provide public transportation coverage in areas not served by public transportation.

Outside the transit area:

Riders, outside of the transit area must have limited access to transportation and must meet one of the following conditions:

Be over 65 years of age or older with proof of identification

Be a Medicare cardholder.

Be certified by application, as having a disability and be outside of the current transit area. This includes people who, because of illness, injury, age, congenital malfunction or other incapacity of permanent disability (including any individual who is a wheelchair user or has semi-ambulatory capabilities), are certified by application.

Ring-a-Ride service is supported by funding from the FTA Section 5310, provided through Idaho Transportation Department's (Enhanced Mobility for Seniors and Individuals with Disabilities) program.

Non-Emergency Medical Service.

Kootenai Health provides non-emergency medical services for access to Kootenai Health facilities through a partnership between Kootenai Health and Citylink North. Citylink North provides the vehicles and Intelligent Transit System and Kootenai Health pays for and operates the service for the community. Services are available Monday through Friday from 6 am to 4:30 pm for the Coeur d'Alene, Dalton Gardens, Hayden, and Post Falls area and in Rathdrum on Tuesdays and Thursdays.

Benewah Area Transit offers rides into the Kootenai County area for people on Medicaid or for a set fee each way. Days and times vary according to driver availability.

Northwest Medical provides Medicaid billed trips for clients and some private pay clients if room is available Monday through Friday from 7:30 am to 5 pm.

Lake City Transportation provides private pay service, cash only, with cost dependent on trip length. They operate Monday through Friday from 8 am to 5 pm and on call after hours.

Senior Transportation

Most senior transportation in the area is provided by Kootenai County, Sunset Taxi, Coeur d'Alene Taxi, Kootenai Health or by the vans provided by the senior living facilities or in private cars operated by paid caregivers.

*See Appendix 6 for a map of Paratransit, Ring-a-Ride, Kootenai Health and fixed route services.

Human Services Transportation

Many human service agencies provide some form of transportation service to their clients. The level of service provided can vary significantly from agency to agency, depending on the clients' needs and the agencies' resources. Transportation services provided by human service agencies can generally be fit into four categories, listed below in descending order of involvement and complexity:

Provide transportation by operating vehicles to transport their clients.

Contract for transportation for their clients through formal arrangements with other transportation providers.

Subsidize transportation by providing clients with bus fare, taxi vouchers, mileage reimbursement or cash.

Arrange for transportation by assisting clients with trip planning and information on transportation options.

Coordination, and participation in the coordination planning process, is a potential benefit to all of these agencies regardless of the level of service provided.

Existing Transportation Services and Resources in the Kootenai County Region:

Please See Appendix 8 for a listing of transportation services and vehicles.

Service Gaps Identified

April of 2015 Meeting

As part of preparation for Kootenai County Transit's Human Services Plan, meetings were held with community stakeholders in 2015 consisting of representatives from:

Ability Works
Adult Probation
City of Post Falls
Coordinated Services of Idaho
Family Promise
Kootenai County Veterans
Kootenai Health
Members of the Public
Panhandle Health
Post Falls Food Bank
Project Search
Senior Companions
Trinity Group Home

Unmet needs/Gaps identified:

Stops at:

15th Street and Best
15th Street and Sherman
15th Street access
1st and Best
Affinity
Aqua Circle Loop (Newby-Ginnings)
Community Action Partnership
Fernan Area

Food Banks
Hawks Nest
North Idaho College
Panhandle Health
Post Falls Senior Center
Tesh
The Landings
VA Clinic on Emma
Wilbur and Atlas

February and June of 2016 Meeting

Meetings were held with:

Area Agency on Aging
Coeur d'Alene Police
City of Hayden
City of Post Falls
Coeur d'Alene Tribe
Community Action Partnership
Coordinated Services
Harmony House
Hayden Senior Center
KMPO
Kootenai County Veterans
Kootenai Health
KROC-Salvation Army
MS Support Group
North Idaho College
Panhandle Area Council
Panhandle Health
Post Falls Food Bank
Senior Companion Program
St. Vincent de Paul
State of Idaho Veterans
United Way

Five Public Meetings in Coeur d'Alene, Hayden, Post Falls and at the County Administration Building in April of 2016 with a total of 29 unique participants.

Unmet needs/Gaps identified:

15th Street and Best *
15th Street and Sherman

** = Multiple Requests (less than 10)*

*** = Multiple Requests (more than 10)*

Unmet needs/Gaps identified:

Faster routes
Bigger signs
More stops
Security on the buses
One direction of service

Accurate and easy-to-read schedules

2016 to 2017 Social Services Advisory Board Meetings

Quarterly meetings were held with the Social Services Advisory Board to identify and address solutions for gaps in service. The advisory board included representatives from the following:

Area Agency on Aging
Idaho Department of Labor
KROC
Mountain States Head Start
North Idaho College
North Idaho Family Group
Panhandle Health
Post Falls Food Bank
Post Falls Senior Center
TESH
United Way
Veterans Services – Kootenai County

Human Services Transportation Plan Workshops

The first Human Services Transportation Plan Workshop was held with representatives from human services and transportation providers. Representatives from the following organizations attended:

Area Agency on Aging
City of Coeur d'Alene
Coeur d'Alene Tribe
Concerned Citizens
Coordinated Services of Idaho
DAV
Heritage Health
Kootenai Health
North Idaho College
Post Falls Food Bank

Unmet needs/Gaps identified

Lack of Service to:
Spokane
St. Maries
Stateline
Flying J area of Post Falls
North Idaho Workforce Center
Montrose Senior Housing
Camelot Estates

More Space for People in Wheelchairs on the bus (or better coordination with paratransit)
 Coordinate with Builders and Cities for Future Planning of accessible bus stops and sidewalks that can be used by persons with disabilities
 Cleaner bus stops
 Cameras on the buses
 Amenities at bus stops

Human Services Transportation Plan Workshop – Disability Advocates

The second Human Services Transportation Plan Workshop was held and included representatives from:

Disability Action Northwest
 Disability Advocates/People with Disabilities

Unmet needs/Gaps identified

Accessible taxi service
 The prohibitive cost of using taxi service or accessible service
 Accessible transportation to the airport in Spokane
 Transportation from rural areas to the urban area
 Rathdrum
 Athol

Future Objectives and Strategies as Identified to Address Gaps in Service

Goal 1 – Continued Improvement in Kootenai County’s Public Transportation Programs			
Outcomes	Objectives	Strategies and Projects	Performance Measurement
<p>To have transit service linking common origins and key destinations with convenient levels of service</p>	<p>Improve access to jobs, education and services used by target group members by supporting core areas’ mobility improvements and a high level of service, as funding allows.</p>	<ol style="list-style-type: none"> 1. Increase transit frequencies in core areas and target expansion of service. 2. Create a first mile/last mile partnership to increase usage of public transit. 3. Support accessible taxi service with subsidized cost for those with disabilities and/or low incomes 	<p>An increase in passenger trips for target groups.</p>

Goal Number 1 Continued

Goal 1 – Continued Improvement in Kootenai County’s Public Transportation Programs			
Outcomes	Objectives	Strategies and Projects	Performance Measurement
To create transit service access for persons and their accessibility tools	Improve access to residents by promoting basic transit services within ¾ mile for everyone in the jurisdictions, as funding allows.	Strengthen pedestrian network around key destinations and ensure paths of access to transit services.	Number of pedestrian improvements, allowing for equal access to transit options, within ¾ mile area of transit network.
Support Job Access	Partner with other agencies to provide job access through enhanced community mobility projects	Identify options for enhancing or creating service to support job access	An increase in passenger trips to stops located near project areas.
Support Rural Access to UZA	Coordinate services in order to increase mobility between rural and urban areas	Identify options and partners for enhancing or creating service to support transit access between rural areas and urban routes	An increase in new areas served.
Support Travel Training Models to Encourage and Improve Access	Coordinate services with social service agencies to provide better access to the fixed route system	Work with social service agencies to provide needed training and/or to utilize their clients as travel training companions	Create equal access to the fixed route system.
Support after hours accessible transit service	Create and implement a program for access to accessible service after hours	Identify options for enhancing current access, or creating new types of service, to support access	An increase in service after hours to job programs or other eligible activities.
Educate consumers: stakeholder agencies, existing riders, and prospective riders	Create and implement public information tools and strategies.	Develop marketing “takeaways” that show routing and stops in relation to key destinations used by the target populations.	Develop travel training tools for agency audiences and for individual riders or prospective riders, keep travel-training data.

Goal 2 – Increased Trip Capacity Through Coordinated Partnerships

Outcomes	Objectives	Strategies and Projects	Performance Measurement
Create new partnerships and relationships to enhance mobility in the area	Develop new partner relationship projects with key stakeholder organizations, toward defining and implementing new mobility project solutions.	Inventory agencies to identify both contact persons and update transportation program information.	Number of contacts, project possibilities, and projects implemented with existing partners and prospective partners.
Create new partnership projects providing trips	Develop and implement new coordinated partnership projects	Develop pilot partnership shuttles, such as for the Workforce Training Center	Number of contacts, project possibilities, and projects implemented with existing partners and prospective partners.
Create new partnerships with taxi, or similar services to identify first mile/last mile solutions	Develop and implement new coordinated partnership projects	<ol style="list-style-type: none"> 1. Develop pilot partnership to meet first mile/last mile gap. 2. Promote voucher programs and vanpool potential or shared-ride services 	Number of contacts, project possibilities, and projects implemented with existing partners and prospective partners.
Create partnerships encouraging vanpooling for businesses and work related travel	Encourage new partnerships for sustainable vanpool solutions for work-type trips originating beyond the city limits.	Develop marketing "takeaways" for increasing vanpool participation	Partner with Vanpool provider to receive numbers quarterly

Goal 3 – Expand Cooperative Information Resources

Outcomes	Objectives	Strategies and Projects	Performance Measurement
<p>Create or expand effective mobility management information function to support new and expanded mobility partnerships</p>	<p>Provide information-based technical assistance, as necessary, to partner agencies: 1) to help secure new transportation funding for the region and 2) to ensure compliance with federal funding regulations</p>	<ol style="list-style-type: none"> 1. Provide technical assistance to applicant agencies around 5310 grant applications. 2. Provide letters of support for agencies seeking transportation funding from non-transit sources, including other human service programs and private foundations. 3. Assist partner agencies who may become 5310 subrecipients in identifying and understanding compliance requirements (e.g. drug and alcohol testing, Title VI Program reporting). 	<p>Defined mobility management performance indicators:</p> <ol style="list-style-type: none"> 1. database contacts partner meetings instances of partner technical assistance provided 2. Total grant funding requested and secured, including local match. 3. Hours of technical assistance around grant compliance.
<p>Enhance information tools supporting mobility</p>	<p>Support mobility management information capabilities, including marketing tools for key human service agency destinations to aide in “trip discovery”.</p>	<ol style="list-style-type: none"> 1. Expand Kootenai County Transit's web presence to reflect projects. 2. Develop agency-based one call/one click “trip planners” and other tools to support destination-specific travel by target group members. 3. Develop web-based, gatekeeper-oriented travel training tools and market these to agency personnel as well as individuals. 	<p>Number and type of contacts, as well as number of hits on the pages</p>
<p>Create educated consumers: stakeholder agencies, existing riders, and prospective riders</p>	<p>Utilize mobility tools to promote awareness of alternative transportation modes and specialized transportation projects to aid in "trip discovery"</p>	<ol style="list-style-type: none"> 1. Outreach to agency gatekeepers to promote usability of brokered trips. 2. Outreach to promote taxi voucher program and vanpool potential or shared-ride services for work or recurring trips. 	<ol style="list-style-type: none"> 1. Number of hits on page 2. Extended time on page 3. Number of people utilizing vouchers and brokered trips

Goal 4 – Capital Improvements to Support Mobility

Outcomes	Objectives	Strategies and Projects	Performance Measurement
<p>Build an environment supporting the ability to access public transit options</p>	<p>Develop pedestrian sidewalk and bus stop improvement program related to the target population’s key transit destinations.</p>	<p>Ensure that key destinations of target groups are identified and addressed</p>	<p>Number of sidewalk and pedestrian improvements within ¾ mile of routes.</p>
<p>Infrastructure supporting trip brokering capabilities, as partners become identified</p>	<p>Support capital requirements for a modest “trip brokering”/ “trip transaction” hub capability, leveraging existing dispatch capabilities and human service agencies to create a seamless experience for people needing transportation.</p>	<p>Establish a mobility manager function that works from existing dispatch technology to enable coordination between types of transit service in order to connect riders with most appropriate form of transportation.</p>	<p>Number of new partners for trip brokering partnership identified and utilized. Number of phone calls and referrals.</p>
<p>Identify local needs for accessible transportation options in order to enhance partnerships and create a community mobility model</p>	<p>Support capital investments, including buses, for investing in human service agencies</p>	<p>Identify needs, funding and appropriate support for partnerships in regard to community mobility in order to increase freedom to choose the best type of transit to fit the client's needs.</p>	<p>New transit funding sought and secured, existing service funding leveraged and coordinated so that the best service for the client's needs can be utilized without duplication of efforts</p>

Priorities

First Level Priorities

Continued improvement in efficiency and effectiveness to enable riders to be able to count on effective service

Vehicle replacement for public transit and non-profit entities enabling service

Accessible bus shelters and amenities

Sidewalk/pedestrian improvements to improve mobility

Coordination of services between agencies for community mobility

Expansion of Ring-a-Ride service
Expand accessible service to rural areas
Partner with taxis to offer low cost accessible taxi service
Provide, or replace, buses as needed to non-profit organizations

Second Level Priorities

Website for dissemination of transportation options and coordination of services available
Web portal for “ones-stop” access to specialized transportation
Easy online trip planning capabilities for clients
Creating community mobility management objectives and partnerships

Third Level Priorities

Regional vanpool program
Interconnectivity between communities, both rural and urban

Appendix 7: Transportation Services in Kootenai County

ALICE IN KOOTENAI COUNTY

2014 Point-in-Time Data

Population: 147,326 | **Number of Households:** 56,177
Median Household Income: \$48,776 (state average: \$47,861)
Unemployment Rate: 8.3% (state average: 5.5%)
ALICE Households: 25% (state average: 25%); **Poverty Households:** 12% (state average: 14%)

How many households are struggling?

ALICE is an acronym for **A**sset Limited, **I**ncome **C**onstrained, **E**mloyed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (the ALICE Threshold, or AT). Combined, the number of poverty and ALICE households equals the total population struggling to afford basic needs. The number of households below the ALICE Threshold changes over time; households move in and out of poverty and ALICE as circumstances improve or worsen. The Great Recession, from 2007 to 2010, caused hardship for many families. Conditions started to improve in 2010 and 2012 for some, but not for all.

Households by Income, 2007 to 2014

What does it cost to afford the basic necessities?

The bare-minimum Household Survival Budget does not include any savings, leaving a household vulnerable to unexpected expenses. ALICE households typically earn above the Federal Poverty Level of \$11,670 for a single adult and \$23,850 for a family of four, but less than the Household Survival Budget.

Household Survival Budget, Kootenai County

	SINGLE ADULT	2 ADULTS, 1 INFANT, 1 PRESCHOOLER
Monthly Costs		
Housing	\$499	\$753
Child Care	\$-	\$829
Food	\$197	\$595
Transportation	\$346	\$693
Health Care	\$127	\$510
Miscellaneous	\$138	\$366
Taxes	\$214	\$284
Monthly Total	\$1,521	\$4,030
ANNUAL TOTAL	\$18,252	\$48,360
Hourly Wage	\$9.13	\$24.18

Idaho Housing and Finance Association

IHFA is a private, not-for-profit housing and finance association that administers several affordable housing programs and works with public and private partners to increase housing affordability for Idahoans. IHFA is not a state agency, nor does it receive any state funding.

About This Directory

This document lists rental housing, emergency shelter and transitional housing providers. It is organized by housing type (affordable, subsidized, emergency shelter and transitional housing) then alphabetically by city. Most listings include the property name, primary contact number, the number and type of units available and some have the property address. This listing is offered as a courtesy to housing consumers. The accuracy of the information is subject to change without notice. To report corrections please call Laurie at the CdA Branch office at 208-762-5113.

Types of Assisted Housing Available

There are four categories of assisted housing in this directory: *Affordable*, which offers fixed below-market rents; *Subsidized*, where sliding-scale rents are tied to tenant income; *Emergency Shelter*, for acute and immediate homelessness prevention; and *Transitional Housing*, to bridge the gap between homelessness and more stable housing.

Page 2 provides additional information on the different categories of assisted housing and where/how to apply for them.

Helpful Information

Most landlords require a credit check and a non-refundable application fee, so be prepared. Some apartment complexes are designed for seniors or elderly tenants, while others are open to all individuals and families.

Verify availability, rental criteria and required fees before submitting an application to avoid unnecessary costs.

FOR RENTAL RESOURCES, VISIT:

www.housingidaho.com

At this website you'll find tools to help you decide how much you can afford to pay for rent, resources every family can use, a current list of available rental units and a rental checklist that may help you to decide which rental unit is right for you.

Section 8 Tenant-Based Rental Assistance Description and Jurisdiction

IHFA offers the Section 8 Housing Choice Voucher program in 34 of 44 Idaho counties through four branch offices. Waiting lists in 2012 are one to over three years. If you'd like to apply to the wait list, please contact the branch office below that is closest to you:

Panhandle / IHFA's Coeur d'Alene Branch Office—915 W Canfield Avenue, Coeur d'Alene, Idaho 208-762-5113 / toll-free 1-866-621-2994

North Central / IHFA's Lewiston Branch Office—208-743-0251 / toll-free 1-866-566-1727

South Central / IHFA's Twin Falls Branch Office—208-734-8531 / toll-free 1-866-234-3435

Eastern Idaho / IHFA's Idaho Falls Branch Office—208-522-6002 / toll-free 1-866-684-3756

Note: Section 8-rental assistance is offered in the remaining 10 counties by separate local housing authorities:

Southwest Idaho (Adams, Boise, Canyon, Elmore, Gem, Owyhee, Payette, Valley, and Washington counties) / Southwestern Idaho Cooperative Housing Authority (SICHA)—208-585-9325

SICHA doesn't maintain an open waiting list.

Ada County (Ada County) / Boise City/Ada County Housing Authority—208-345-4907

Pocatello / Pocatello Housing Authority—208-233-6276

Assisted Housing Categories—Which one is best for you?

Section 8 Tenant-based assistance.	Sliding-scale project-based assistance	Affordable rental housing/ Section 42 (Tax Credit) or HOME developments
<p><i>For tenants on very low or fixed incomes.</i></p> <p>Tenants qualify for the program based on income, and are placed on a waiting list.</p> <p>Pros: Household pays 30% of income toward rent; balance paid by program. Tenant receives a rental voucher and selects housing.</p> <p>Cons: Current wait in Idaho is one to four years;</p> <p>Best suited for: Those on fixed incomes (SSI, Disability, etc.). A single person living on \$19,350 (Kootenai) \$19,650 (Bonner) and \$17,950 in the remaining Northern Counties or less; or a 3-person household living on \$24,850 (Kootenai) \$24,600 (Bonner) and \$23,050 in the remaining other Northern Counties or less.</p> <p>Where to apply: In the five Northern Counties, IHFA’s Coeur d’Alene Branch Office— 915 W Canfield Avenue, Coeur d’Alene. 208-762-5113 / toll-free 1-866-621-2994. --- See Section 8 info on page 1 for other regions of Idaho</p>	<p><i>For tenants on very low or fixed incomes.</i></p> <p>Tenants qualify for the program based on income.</p> <p>Pros: Waiting period is generally shorter and is based on unit availability.</p> <p>Cons: Apartments only</p> <p>Best suited for: Those on current Section 8 waiting lists; anyone who would meet Section 8 income guidelines. A single person living on \$19,350 (Kootenai) \$19,650 (Bonner) and \$17,950 in the remaining Northern Counties or less; or a 3-person household living on \$24,850 (Kootenai) \$24,600 (Bonner) and \$23,050 in the remaining other Northern Counties or less.</p> <p>How to apply: Contact apartment manager, complete and submit application.</p>	<p><i>Rents are fixed and affordable to households at 30%, 50%, or 60% of Area Median Income.</i></p> <p>These complexes received federal support and reserve a percentage of units for low- and moderate-income households.</p> <p>Pros: Waiting period is generally shorter. Several new complexes are available.</p> <p>Cons: Apartments only; fixed rents not affordable to everyone.</p> <p>Best suited for: Very-low, low- to moderate-income households.</p> <p>How to apply: Contact apartment manager, complete and submit application.</p>

Basic Tips for Renters

- Landlords or property managers want to know that you will respect the property and other tenants, and pay the agreed-upon rent on time. Credit checks and references are tools often used to indicate past performance in these areas.
- Be prepared to demonstrate that you will be able to meet the lease requirements and be a responsible tenant. Always be honest and up front with your landlord to avoid potential problems later on.
- Don't be afraid to negotiate if you require a change to the standard lease, but keep the first two items in mind as you go. Specify any changes or agreements in writing, then follow through with commitments to the property owner or manager.
- Know your rights and responsibilities and read all leases carefully before signing. You may obtain a copy of "Tenant's Rights" from your local Idaho Legal Aid Services branch office: Boise/208-345-0106; Caldwell/454-2591; Coeur d'Alene/667-9559; Idaho Falls/524-3660; Lewiston/743-1556; Pocatello/233-0079; and Twin Falls/734-7024.
- For a copy of Idaho Landlord/Tenant Guidelines, visit <http://www.ag.idaho.gov/publications/consumer/LandlordTenant.pdf>
- Fair Housing Law applies to housing sales, rental and financing. If you feel you have been a victim of discrimination based on a protected class (race, color, ethnic origin, religion, gender, familial status or disability), contact the HUD Fair Housing/1-800-877-0246, or Intermountain Fair Housing Council/1-800-717-0695.
- If you have a qualifying disability that substantially limits one or more major life activities, you may request a "reasonable accommodation" from your landlord. This may involve a structural modification (i.e. wheelchair ramp) or an exception to standard policy (such as a designated parking space or permission to keep an assistance animal). Landlords may require written verification from a qualified individual as to the need for the specific accommodation(s) requested, but may not ask for details or the nature of the disability. An accommodation request may be denied if it poses an undue financial or administrative burden to the property owner. For more information, visit http://www.ihfa.org/research_fairhousing.asp

Sandpoint	Bonner Gospel Mission	263-6698	Single Men	24 beds

Homeless Shelters and Related Services

Due in part to a economic factors, increasing housing cost gaps, high consumer debt and congressional priorities, homeless shelters and service providers are experiencing their highest demands for services in decades. Since 2000, waiting lists for housing assistance have gone from several months to several years.

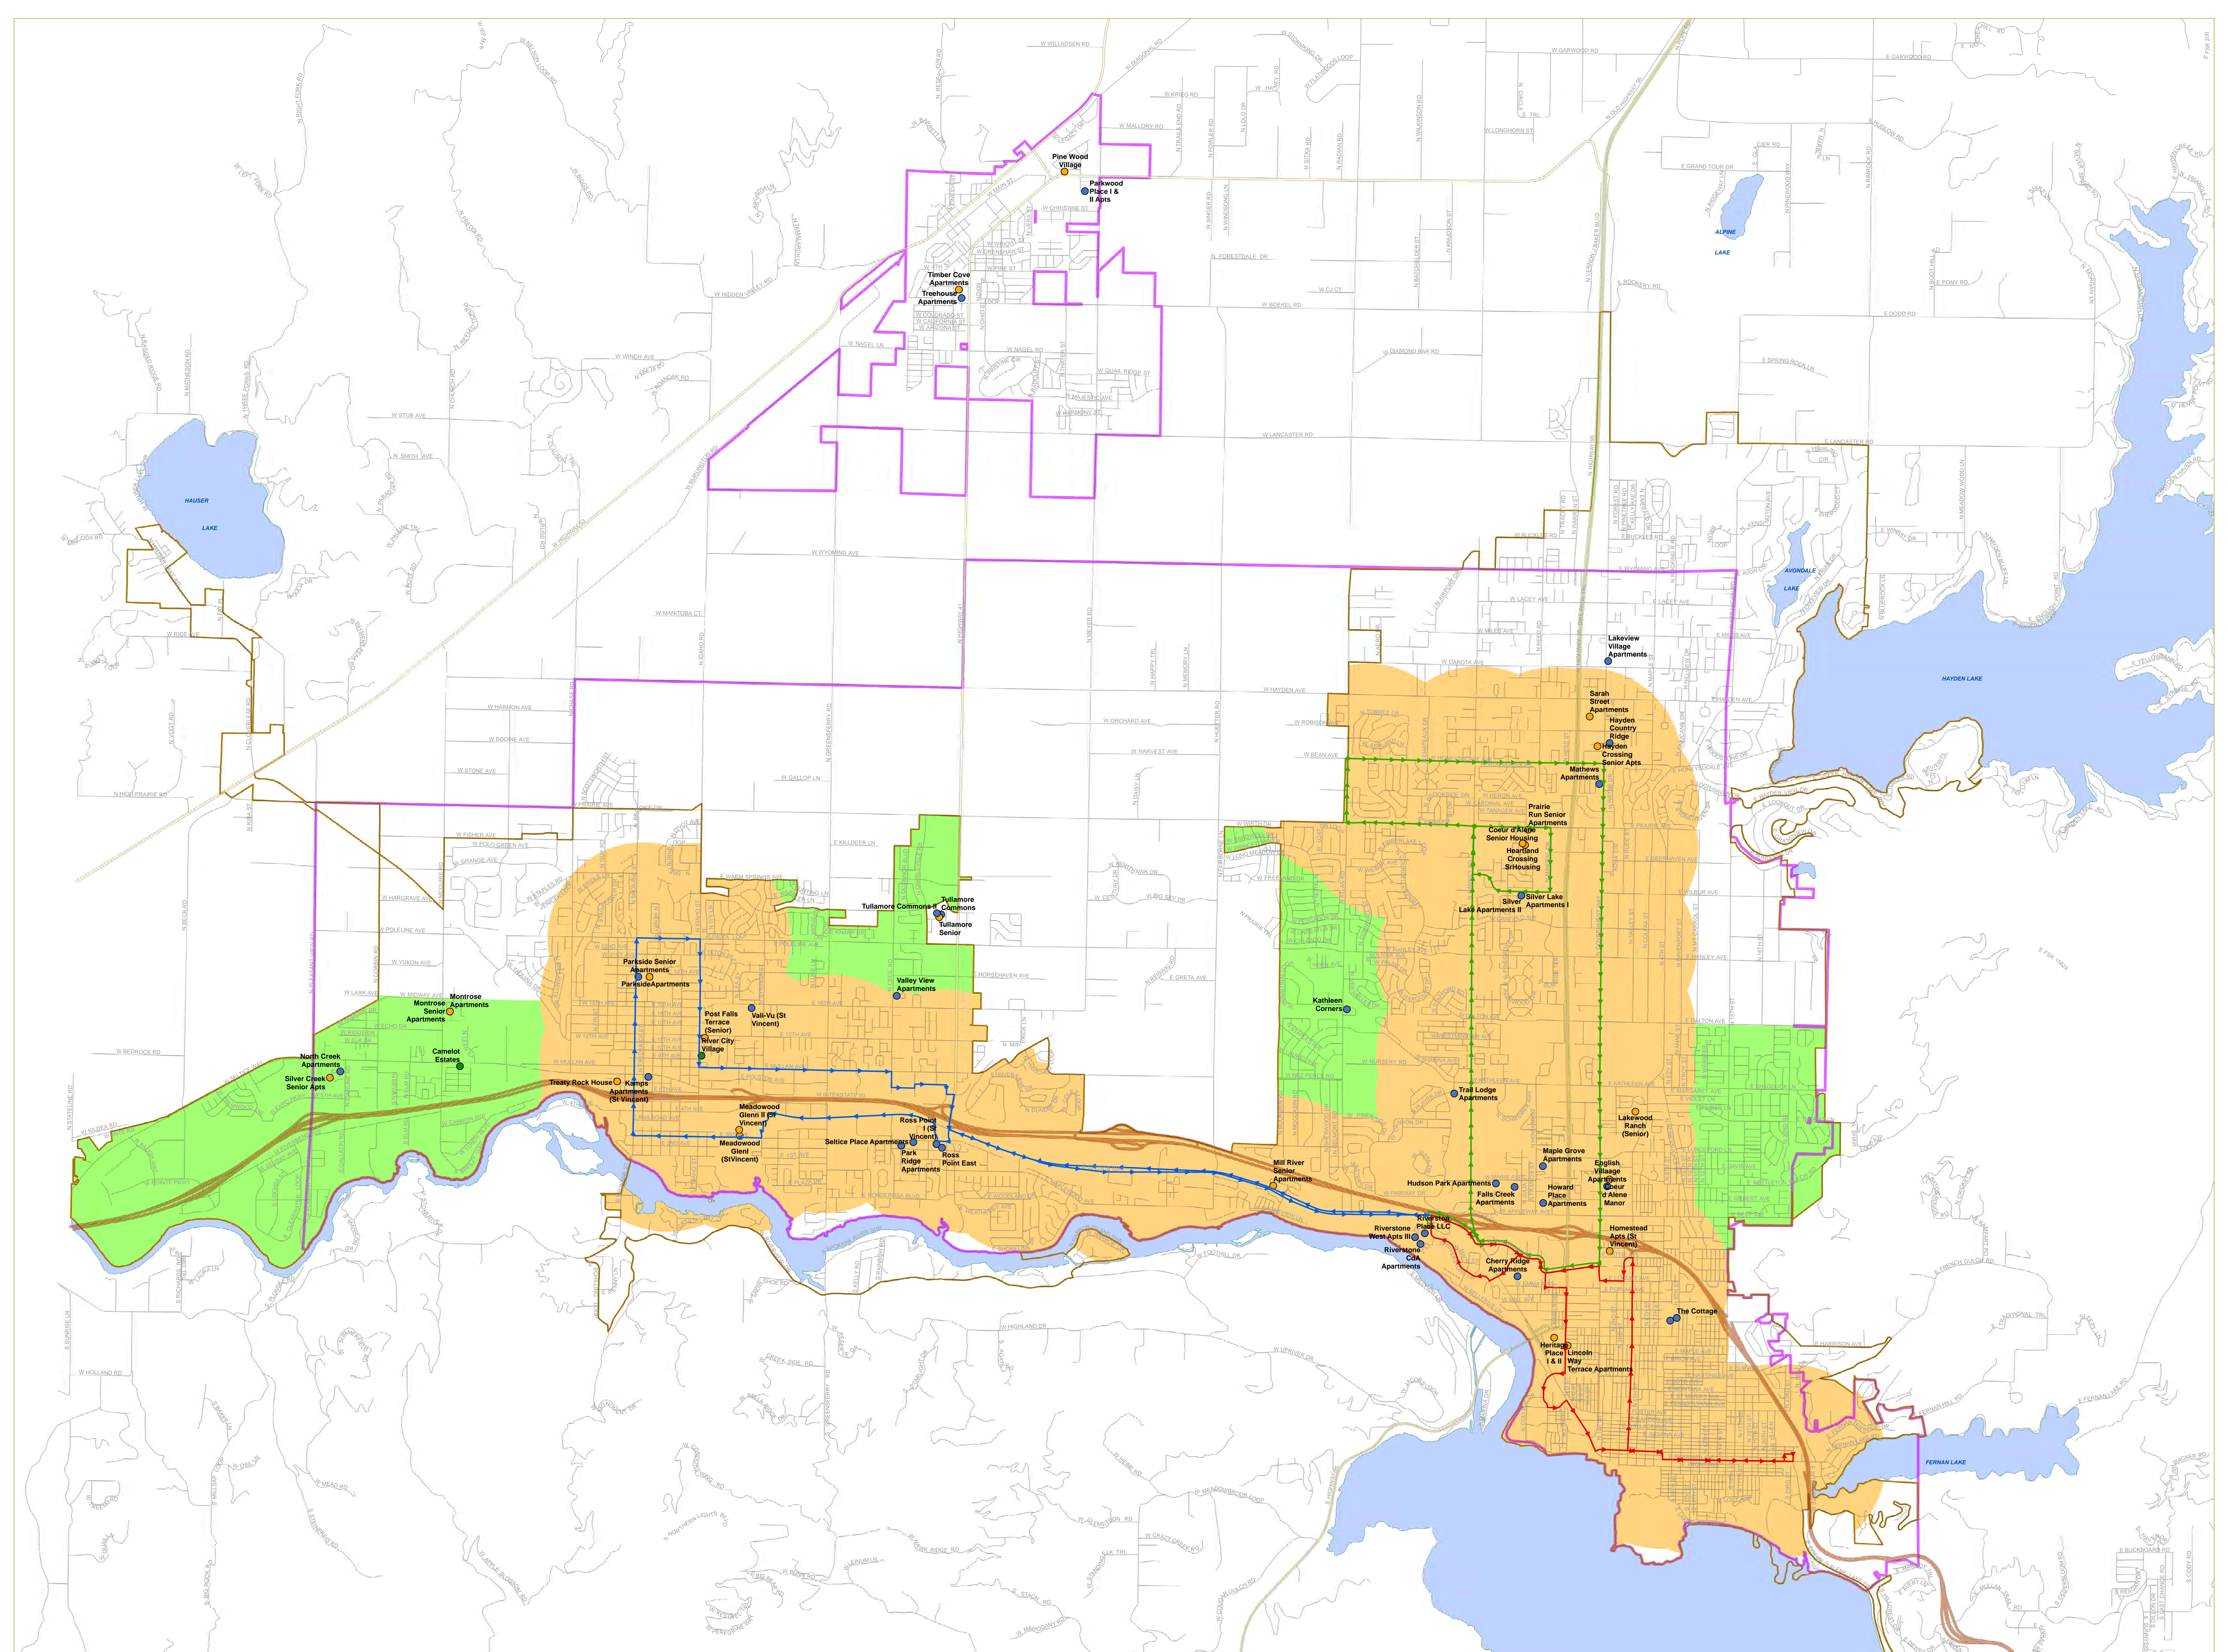

High Demand. On any given day, thousands of Idaho individuals and families need help. Shelters and transitional housing providers throughout Idaho often have waiting lists, serve clients on a first-come, first served basis, and cannot provide same day service.

Planning ahead. When possible, don't wait until you or your family are actually on the street to contact a local shelter. At the first indication that your housing is threatened (unexpected loss of income, increase in expenses or other problem), contact the nearest provider(s) to find out how and where to apply for services.

Be resourceful. In some communities, local governments maintain lists of community resources at the City Clerk's office or County Welfare office, while local church and civic organizations may be aware of other types of assistance available.

*Family = Fam; Elderly = Eld; Accessible = Acc (modified counter/outlet heights, bath)

*Stu. = Studio; 1 bd = 1 Bedroom; 2 bd = 2 Bedrooms; 3 bd = 3 Bedrooms; 4 bd = 4 Bedrooms

VA Veterans Transportation Service

The Veterans Transportation Service (VTS) is a new program of the Veterans Health Administration (VHA) Central Business Office. VTS seeks to provide transportation services to VA Medical Centers as well as technology and mobility management training to Medical Center staff that enable VTS services to better interface with other community transportation resources.

VA Medical Centers and VTS sites are ideal partners for Veterans Transportation and Community Living Initiative (VTCLI) grant projects. The VTS Regional Coordinators, listed below, can help VTCLI grantees or applicants connect with the appropriate transportation professionals within the nearest VA facility.

For more information on the VTS, visit

<http://www.va.gov/healtheligibility/veterantransportationservice/>.

Determine the appropriate VISN(s) for your community and find the Regional Coordinator for that VISN below.

Regional Coordinator: Yvonne Pozgar

VISNs Assigned: 1-8
